Heritage of the Printed Book Database
Accessing the record of Europe’s book heritage

CERL Electronic Resources
The CERL Thesaurus (CT)
The CERL Thesaurus contains forms of names for imprint places, persons and corporate bodies, printers and their devices, as well as provenance information.

The CERL Portal (CP)
The CERL Portal enables scholars to search across the contents of online manuscript databases, in combination with selected large databases of printed materials, thereby overcoming the historical differentiation of printed books and manuscripts in libraries.

Material Evidence in Incunabula (MEI)
MEI is a database for recording and searching the material evidence of 15th-century printed books: ownership, decoration, binding, manuscript annotations, stamps, prices, etc.

Can You Help? – Identifying Provenance Evidence
This is a resource for public discussion and identification of provenance queries. It allows the sharing of queries with an extensive network of specialists and the contribution of expertise.

Smaller data sets
CERL offers access to Paul Needham’s Index Possessorum Incunabulorum (IPI), Margret Lane Forde’s Early Book Owners in Britain, and Eric White’s Researching Print Runs.

File contributions
If you wish to contribute bibliographic records to the HPB, please contact the CERL Executive Manager at marian.lefferts@cerl.org. CERL will accept data in MARC / UTF-8. The Data Conversion Group (DCG) in Göttingen have developed and implemented a UNIMARC–MARC21 conversion, which aims at retaining as much of the data as possible, in particular elements concerning antiquarian material. Elements that lack a direct counterpart in MARC21 format will at least visible in the HPB (and ideally also retrievable). In preparation for loading, DCG analyses all data sets and harmonises data across the various fields and subfields so as to support uniform search and retrieval across the HPB database.

The HPB Database is a valuable resource for studying the transmission and dissemination of texts in print. When was a text first published, in which country? When was it translated, did it see many reprints, to which countries did it spread? How many copies of its editions survive today? In which collections, and who were the previous owners? The HPB Database’s specialist indexes allow the interrogation of the database in many ways (e.g. imprint data, provenance data, size of the books, fingerprints, references and of course author and title). The HPB help text helps you to makes the most of these, see www.cerl.org/help/hpb/main.
The Heritage of the Printed Book Database (HPB) offers scholars in all disciplines access to 5 million items of the European printed heritage, from its earliest beginnings (c.1455) to around 1830.

The HPB contains a steadily growing number of catalogue records contributed by libraries, mainly members of the Consortium of European Research Libraries (CERL). The majority of files consist of high-level bibliographical records created by book-in-hand cataloguing. Some others contain records created as a result of retroconversion projects, and these are gradually being replaced by sections of enhanced records. CERL is continually updating and adding new files to the database, widening its scope, coverage and value to scholars.

The HPB Database enables scholars to locate and identify items held in many of Europe’s major libraries. A wealth of copy-specific information like provenance or binding information is made available. As digitisation of cultural heritage items proceeds all across Europe, the HPB Database is offering direct access to content by linking to digital reproductions from contributing libraries, when available.

With the full integration of the CERL Thesaurus (CT) to support search and retrieval, users need not enter all variant forms of names as separate search terms. They may retrieve a complete list from the CERL Thesaurus, and adopt all variants as search terms. Searches for publication places, personal names (authors, editors, translators etc.) and names from imprints (printers, publishers, booksellers etc.) can thus be expanded.

HPB is made available free of charge to readers at CERL member libraries and subscribing institutions. A limited view of HPB records with simple retrieval options is also freely available via the CERL Portal (http://cerl.epc.ub.uu.se/).

Contributing Libraries and Institutions
Belgium: Royal Library
Croatia: National and University Library
Czech Republic: National Library
Denmark: Royal Library
Estonia: Academic Library of Tallinn University, Tartu University Library
Finland: National Library
France: Bibliothèque nationale de France, l’Agence bibliographique de l’enseignement supérieur (ABES), Bibliothèque municipale de Lyon,
Germany: Bayerische Staatsbibliothek, Gemainamer Bibliothek Verbund, Niedersächsische Staats- und Universitätsbibliothek
Hungary: National Széchényi Library, Szeged University Library
Italy: Sistema Bibliografico Nazionale (SBN) from ICCU, Regione Toscana
Lithuania: National Library
Netherlands: Koninklijke Bibliotheek, the National Library of the Netherlands
Norway: National Library
Poland: National Library of Poland, results of the Bosch project, Warsaw University Library, Wrocław University Library, Jagiellonian University Library,
Russia: National Library, St Petersburg
Slovenia: National and University Library
Spain: Biblioteca Nacional de España, Universidad Complutense
Sweden: Royal Library
USA: Yale University Libraries
Vatican: Biblioteca Apostolica Vaticana
