Search Advice

Your search can be performed on local MEI database and the Incunabula Short Title Catalogue (ISTC). To include records from the ISTC, check the checkbox below the search line.

Please note that the ISTC SRU-server seems to have a problem with certain Unicode characters, in particular diacritics. Please try the base character instead. (i.e. instead of "Böhmen" type "Bohmen".)

By clicking [more search options...](#) you may search for characteristics of certain copies and their provenances. This search options apply to the local database only. Please switch off the ISTC search when using them.

Search Advice

Your search can be performed on local MEI database and the Incunabula Short Title Catalogue (ISTC). To include records from the ISTC, check the checkbox below the search line.

Please note that the ISTC SRU-server seems to have a problem with certain Unicode characters, in particular diacritics. Please try the base character instead. (i.e. instead of "Böhmen" type "Bohmen".)

By clicking [more search options...](#) you may search for characteristics of certain copies and their provenances. This search options apply to the local database only. Please switch off the ISTC search when using them.

Innovative Approach to sources

- Converting physical evidence into historical evidence
- Capturing the movement of the books as evidence of trade and use by tagging geographically and chronologically
- Integration of provenance records from different sources: book-in-hand, paper catalogues, and soon, electronic ones

OBJECTIVES:

- Extensive, systematic quantitative analysis of thousands of high quality records
- To identify, and visualize:
 - Trends of distribution and use
 - The reception and use of books: social history
 - The reconstruction of dispersed collections and libraries
