Alvin portal for digital collections and digitized cultural heritage – an introduction

Alvin was established in 2014 and, today, it contains app. 135 000 catalogue entries and 96000 entries with a digital content

UPPSALA UNIVERSITET

Facts and functions

- Alvin is a digital repository and a platform for describing, cataloguing and publishing free digital resources on the Internet

- Alvin is organised in a consortium consisting of the Swedish university libraries in Uppsala, Lund and Göteborg and a number of other institutions active within the ALM-sector in Sweden

- Alvin is built to form an integral part of a digitization workflow

- Alvin is developed and maintained by Uppsala University Library

- Resources can be downloaded freely, metadata can be harvested by OAI-PMH, permanent links, and internal linking between individual book-pages, persons, and organisations facilitates scholarly communication. An API will allow for better interaction with contents in 2018 and better search functions are being developed

Biography

Greve, hovman, ämbetsman. G:s bibliotek kom till UUB 1686. Samlingen omfattade 4.700 volymer och sönderfaller i bl.a. följande sex delar. 1. En del av böckerna har tillhört Kristina. Böcker från Böhmen, Mähren och Danmark ingår här (Walde, 1931, s. 163; Walde, 1916, s. 237, 287, 292 f., 322, 331 f.). 2. En annan del utgörs av Stephanus Stephanius bibliotek som De la Gardie köpte av änkan 1651, sannolikt för Kristinas räkning, och som införlivades med De la Gardies bibliotek på Läckö 1654 (Ehrensvärd, s. 331). 3. En tredje avdelning är krigsbyte från Polen, bl.a. Kungl. biblioteket i Warszawa [1655?] (se t.ex. Walde, 1920, s. 64, 89 f.). 4. Jörgen Reedtz bibliotek tillföll De la Gardie genom krigsbyte 1658 (Walde, 1920, s. 234 ff.). 5. Även Gunde Rosenkrantz och faderns, Holger Rosenkrantz, bibliotek på Vindinge tillföll De la Gardie genom krigsbyte 1658 (Walde, 1920, s. 215; 242 ff., isht 293 ff.). I denna samling ingick även Anders Sørensen Vedels bibliotek (Walde, 1920, s. 327 ff; 356). 6. Släkten Ruds bibliotek kom också sannolikt i De la Gardies ägo gm krigsbyte 1658 (Walde, 1920, s. 270). Märk att en del dansk litteratur torde ha köpts in av De la Gardie och att det ofta är svårt att veta hur förvärvet gått till (Walde, 1920, s. 244).

UPPSALA UNIVERSITET

Matters to be decided

LIGATUS

A research centre of the University of the Arts London with projects in historical libraries and archives.

A stable model for connecting Alvin to the Ligatus glossary
Including technical consideratios such as an API-connection, download model etc.

ALVIN

Platform for digital collections and digitized cultural heritage

UPPSALA UNIVERSITET

Extending cooperation

- The technical structure of Alvin is based on a shared platform

- The shared platform can allow for extended partnerships with interested institutions and/or projects for describing and publishing bookbindings

- To be able to evaluate long distance cooperation, we seek an interested partner institution or project to be able to test the requirements needed for extended cooperation

- A test will include communication issues, membership organizational issues, distributed data storage, technical, financial, and language issues, modular or full use, matters arising etc.
